

Fitter and Machinist Apprenticeship Program Overview

Hazell Bros offers four-year Fitter and Machinist apprenticeships, working on various mechanical plant, machinery and equipment.

As an apprentice with us, you would be part of a team working alongside experienced trades people assisting in the manufacture, repairs and fitting of metal components for industrial machinery and other equipment.

Our apprentices use a range of tools and engineering techniques to maintain and repair mechanical plant, machinery and equipment to operational standards.

We require our apprentices to have a current driver's licence (or ability to get one), excellent communication skills, a willingness to learn and try new things, enjoy problem solving, be a team player.

At Hazell Bros we value diversity in all its forms, including gender diversity. We encourage applications from women to join our team

FITTER AND MACHINIST

A hands-on apprenticeship to manufacture, repair and fit metal components for industrial machinery and other equipment. Skills will be developed on and off the job learning under a qualified tradesperson.

Typical tasks include:

- Assisting the team with equipment maintenance
- Examining detailed drawings or specifications to find out job, material and equipment requirements
- Dismantling faulty tools and assemblies and repair or replace defective parts
- Cut thread, bend and install hydraulic systems
- Precision measurement
- Diagnosis/fault finding
- Operate machines to produce parts or tools by turning, lineboring, milling, planning, shaping, slotting, grinding or drilling metal stock or components for our extensive fleet across our civil construction, earthmoving, concrete, quarries operations
- Transforming fabricated parts into objects and products
- Check accuracy and quality of finished parts, tools or sub-assemblies

Statewide travel may be required depending upon project location.
