

Vehicle Mechanic Apprenticeship Program Overview

Hazell Bros offers four-year apprenticeships in the light and heavy vehicle industry, repair and maintenance of mobile plant and equipment, light vehicles, construction vehicles, trucks.

As an apprentice with us, you would be part of a team working alongside experienced tradespeople assisting in the repair and servicing of road transport vehicles for commercial clients and our own transport, civil construction, earthmoving, concrete and quarries fleet.

We require our apprentices to have a current driver's licence (or ability to get one), excellent communication skills, a willingness to learn and try new things, enjoy problem solving, be a team player, be able to undertake a number of diagnostic processes associated with the vehicles and/or engines.

At Hazell Bros we value diversity in all its forms, including gender diversity. We encourage applications from women to join our team.

HEAVY VEHICLE

A hands-on apprenticeship in the heavy commercial industry to service our extensive fleet and external clients.

Skills will be developed on and off the job learning under a qualified tradesperson.

Typical tasks include:

- Assisting the team with maintenance and diagnostic works on engines, transmissions, fuel systems, brakes, suspension units, and electrical systems.
- Being involved in safety and roadworthy inspections.
- Our apprentices will be exposed to an array of on and off road assets also including stationary engines (generators, pumps, quarry equipment); anything from trucks to mobile cranes, excavators to dozers.

LIGHT VEHICLE

A hands-on apprenticeship in light vehicle to service our extensive fleet and external clients.

Skills will be developed combining on and off the job learning under a qualified tradesperson.

Typical tasks include:

- Assisting the team with repair, service and maintenance of light vehicles.
- Repair diffs, suspension, as well as fabricating trailer components, using power tools, machinery including hydraulic presses and basic auto electrical.

Statewide travel may be required depending upon project location.

MOBILE PLANT

A hands-on apprenticeship specialising in maintaining site and workshop large scale engines, repairing and diagnosing a wide range of mobile plant equipment.

Skills will be developed combining on and off the job learning under a qualified tradesperson. Typical tasks include:

- Assisting the team diagnosing and repairing hydraulic control systems, heavy vehicle air braking systems, mobile plant suspension systems, power shift transmissions, mobile plant hydraulic systems and variable transmissions
- Diagnosis and fault finding using traditional methods as well as using fault scanning equipment computer equipment.
