

Civil Construction Engineering Graduate / Undergraduate Program Overview

Hazell Bros offers two year graduate programs, three month paid work placements and/or scholarship programs for undergraduates in the civil construction industry working on a variety of civil infrastructure projects across Tasmania.

The civil construction industry includes the design, planning, creation, construction and maintenance of civil infrastructure (basically anything that will make peoples lives easier!).

As an undergraduate/graduate with us, you would be part of a team working on civil engineering infrastructure projects, from small civil works to major infrastructure projects.

We require applicants to have a current driver's licence (minimum P1), own reliable transport, excellent communication skills, a willingness to learn and try new things, enjoy problem solving, be a team player, be able to calculate materials etc., enjoy working outdoors, full working rights and have a genuine desire to learn about and work in the civil construction industry.

At Hazell Bros we value diversity in all its forms including gender diversity. We encourage applications from women to join our team.

GRADUATE

A hands-on two year program in civil engineering construction to service some of Tasmania's major and minor civil infrastructure projects. Skills will be developed through on the job and off the job learning under a qualified Civil Engineer.

Typical tasks include:

- Assist our teams with civil infrastructure projects, including roads, dams, irrigation schemes, hydro, marine & renewable energy works projects
- Using differential GPS machine and handheld technology
- Working in high activity work areas
- The beginning of your career in the civil construction industry.

UNDERGRADUATE

A hands-on three month paid work placement in civil engineering construction to service some of Tasmania's major and minor civil infrastructure projects. Skills will be developed through on the job learning to complement your academic studies under a qualified Civil Engineer.

Typical tasks include:

- Assist our teams with civil infrastructure projects, including roads, dams, irrigation schemes, hydro, marine renewable energy works projects
- Using differential GPS machine and handheld technology
- Working in high activity work areas

Statewide travel may be required to and from the job for extended periods of time depending upon project location.
